

SAMAREH JACK

STATEMENT OF PURPOSE

I help people and organizations move forward by making the invisible visible — whether that's a pattern in data, a breakdown in communication, or a system creating friction no one has named. I'm transitioning from software development into customer-facing roles where teaching, stakeholder partnership, and solving real problems for real people are central to the work.

CORE COMPETENCIES

Customer Success & Enablement

- Teaching and customer training (including graduate-level CS instruction)
- Customer requirements analysis and needs clarification
- Stakeholder management and cross-functional facilitation
- Solution design centered on customer goals

Strategic Problem-Solving & Systems Thinking

- Pattern recognition across people, processes, and data
- Root cause analysis and process improvement
- Technical translation — bridging technical and non-technical teams
- Leading initiatives without formal authority

PROFESSIONAL EXPERIENCE

Founder & Practitioner

Feb 2026 – Present

Professional Accompaniment (a coaching practice)

accompany.samarehjack.com

- Provide structured, short-term support to individual clients, tailoring each engagement to both the problem and the person, and adapting the process as I learn how they work
- Frame concrete next steps as experiments, running each through a Plan-Act-Reflect cycle, iterating on what each client's results reveal, and designing every engagement to build independence
- Match the mode of support to the situation, using live conversation, written exercises, or between-session check-ins depending on what fits the client

Research Lead & Strategic Consultant

July 2018 – Present

Peaceful Means

Madison, WI

- Designed and led a qualitative research study that revealed unintentional discrimination patterns organizational leadership didn't recognize; data visualizations made findings undeniable and sparked organization-wide dialogue despite initial resistance
- Delivered trainings and consulting to individuals and organizations on dispute resolution, effective communication, and navigating difficult conversations
- Managed research and writing of impact reports for international nonprofits, including survey design, data analysis, and stakeholder presentation

Education Specialist (Temporary)

Aug 2023 – Oct 2023

BadgerBOTS

Madison, WI

- Conducted research across existing robotics education curricula to inform and adapt the FIRST LEGO League program for underrepresented elementary students.

SAMAREH JACK

.Net Software Developer

Sep 2018 – May 2021

Wisconsin Interactive Network (NIC)

Madison, WI

- Developed full-stack web applications in a Scrum team environment using C#.NET MVC, SQL, HTML/CSS, and REST APIs
- Experience confirmed that my strengths lie in customer-facing work, teaching, and facilitation — informing my transition to customer success and strategic roles

.Net Software Engineer

Jan 2017 – Jan 2018

UW-Madison, Division of Information Technology, Web and Mobile Solutions

Madison, WI

- Partnered with customers to clarify requirements through conversation, simplifying solutions they assumed would be complex and reducing scope, accelerating delivery, and increasing satisfaction
- Gathered business requirements, clarified bugs and enhancements, and brought projects to completion through sustained stakeholder partnership
- Developed full-stack web applications using C#.NET MVC, VB, LINQ, HTML/SASS/CSS, and Bootstrap

Graduate Teaching Assistant

Aug 2015 – Dec 2016 & Jan 2018 – May 2018

UW-Madison Department of Computer Sciences

Madison, WI

- Taught undergraduate computer science across four courses — Data Structures, Discrete Mathematics, MATLAB, and Intro to AI — adapting approach to different technical domains and student skill levels
- Developed a teaching method focused on connecting students to what they already knew, enabling them to reach answers independently rather than relying on direct instruction
- Created assignments, proctored exams, and provided detailed feedback to support student learning

Administrative Assistant – full-time volunteer

May 2013 – Aug 2015

Research Department of the Bahá'í World Centre

Haifa, Israel

- Facilitated operational and inter-office meetings as administrative assistant — guiding educated researchers through disagreement to decisions without formal authority
- Identified incompatible labeling systems causing days of back-and-forth on every cross-departmental review; navigated organizational resistance and collaborated with incoming department head to implement a unified system, eliminating the chronic inefficiency
- Designed and implemented automated reporting dashboards, enabling the department head to access data on demand rather than waiting for manual reports
- Reviewed researchers' memoranda for communication clarity and accuracy before distribution

EDUCATION

Masters of Science in Computer Science

University of Wisconsin – Madison

Focus: Human-Computer Interaction and Data Visualization

GPA: 3.766

Bachelors of Science in Computer Engineering

University of Wisconsin – Milwaukee

Graduated Summa Cum Laude with Honors

GPA: 3.863

PROFESSIONAL DEVELOPMENT CERTIFICATES

How to Influence Without Direct Authority *UW-Madison, 2017*

Project management *UW-Madison, 2017*
